

BENARD ZIBIRI DAVID

OBJECTIVE

Intrigued by the advancement of modern computing, I am seeking and learning new knowledge to effectively apply them in solving everyday problems. A productive, goal driven young man, capable of working in a challenging environment with little or no supervision as well as working effectively in a team.

EXPERIENCE

ehealth4Everyone, Garki II, FCT Abuja

June 2021 - Present

Frontend web developer

- Developed multiple dynamic and browser compatible pages using application prototype.
- Implemented UI audits and updates to the web applications based on stakeholder requirements
- Integrated RESTful APIs to the web applications to support data visualization and management.
- Collaborated with the engineering team to build a manual unit testing infrastructure thereby significantly reducing the number of reported bug issues
- Supported the development of a web data management interface to support the storage of thousands of rows of data.
- Executed consistent code reviews and bug fixes on company products thereby significantly reducing technical debt.

Mira Technologies

January 2020 - May 2021

Frontend web developer

- Supported the launch of a visually appealing, user-friendly application with interactive features to optimize traffic, page views, and user experience (UX).
- Implemented User interface and applications audits throughout product development
- Standardized all new features with a mobile-responsive approach and strategy.
- Integrated RESTful APIs to the web application.
- Implemented content updates to improve SEO optimization of the web application.
- Created blog sites using WordPress based on client requirements.

Center4Tech

April 2018 - October 2018

Frontend Web Developer

- Supported youth development by introducing the students to the concept of web development
- Coordinated hands-on development tasks to improve student skills.
